Professional Summary

Third-year B.Tech Information Technology student (CGPA: 8.98/10) with hands-on experience building AI/LLM applications, full-stack systems, and machine learning models. Proficient in Retrieval-Augmented Generation (RAG) pipelines with LangChain, end-to-end ML with Scikit-learn and Streamlit, and full-stack development with Node.js and Express.js. Strong foundation in Data Structures & Algorithms with 130+ problems solved on LeetCode. Seeking a Software Development Engineer (SDE), Python Developer, or AI/ML Internship to deliver production-quality, data-driven software solutions.

Technical Skills

- **Programming Languages:** Python, Java, C, C++, JavaScript
- **AI / Machine Learning:** LangChain, Retrieval-Augmented Generation (RAG), Hugging Face, Vector Embeddings, ChromaDB, Scikit-learn, Pandas, NumPy, Matplotlib, Prompt Engineering, Feature Engineering, Regression, Model Evaluation
- **Web Development:** HTML, CSS, Node.js, Express.js, Streamlit, REST APIs
- **Databases:** MySQL, SQLite, SQL, Database Design
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab
- **Core Subjects:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Education

Shri Guru Gobind Singhji Institute of Engineering and Technology 2025 – 2028
Bachelor of Technology in Information Technology CGPA: 8.98 / 10

Swami Vivekanand Institute of Polytechnic, Latur, Maharashtra 2021 – 2024
Diploma in Computer Engineering Percentage: 93.65%

Projects

GitHub Repository Assistant | Python, LangChain, Hugging Face, ChromaDB, Streamlit

- Built an AI-powered Retrieval-Augmented Generation (RAG) application that lets users query any GitHub repository in natural language, retrieving semantically relevant code and documentation instead of manual searching.
- Designed a full RAG pipeline: recursive repository ingestion via the GitHub API, document chunking, Hugging Face embedding generation, and semantic similarity search using a ChromaDB vector store.
- Integrated an instruction-tuned LLM (Qwen2.5-72B-Instruct) through the Hugging Face Router with LangChain's ChatOpenAI interface to generate context-grounded answers about repository architecture, functions, and implementation details.
- Delivered an interactive Streamlit chat interface, enabling conversational, context-aware exploration of unfamiliar codebases.

Multi-Agent Research System | Python, Streamlit, Multi-Agent Orchestration

- Developed an interactive AI research assistant that orchestrates multiple specialized agents in sequence to automate information gathering, synthesis, and analysis for research queries.
- Architected a modular pipeline separating agent roles, custom tool integrations, and execution logic to enable extensible multi-agent collaboration.
- Deployed the system with a Streamlit interface for end-to-end interactive research workflows. [Live Demo]

Student Performance Prediction using Machine Learning | Python, Pandas, NumPy, Scikit-learn, Streamlit, Pickle

- Engineered an end-to-end machine learning pipeline to predict student academic performance on a dataset of 2,000 student records across 15 academic and lifestyle features, from raw data to a deployed prediction interface.
- Performed data preprocessing including missing-value imputation, categorical encoding, and feature engineering to improve model accuracy and reliability.
- Trained and evaluated multiple regression models (Linear Regression, Random Forest) using Scikit-learn, achieving an R^2 score of 0.96 (MAE: 2.53) with the best-performing model, then serialized it using Pickle for efficient reuse without retraining.
- Built an interactive Streamlit web application enabling real-time score prediction from user-provided inputs. [Live Demo]

Smart Expense Manager System | Node.js, Express.js, SQLite, HTML, CSS, JavaScript

- Built a full-stack web application to track income and expenses, implementing complete CRUD functionality for financial records.
- Architected a normalized SQLite database schema and a responsive, real-time interface for transaction entry, management, and category-based organization.

Internships & Certifications

- **AI & ML Internship** – Codomax Digital Solutions, July 2026
  Completed a 2-week hands-on internship applying core AI/ML concepts to real assigned tasks. (Certificate ID: CDM/CERT/5772)
- **Frontend Development Virtual Internship** – CodeAlpha, June 2026 – July 2026
  Completed a hands-on virtual internship in frontend web development under mentorship. (Certificate ID: CA/DF1/134703)
- **Machine Learning with AI Training** – Internshala & IITM Pravartak, January 2025
  Completed an 8-week program covering ML fundamentals, Python, data analytics, and supervised/unsupervised learning; recognized as a Top Performer. NSDC & Skill India certified, Grade A.

Achievements

- Solved 83+ Data Structures & Algorithms problems on LeetCode.
- Diploma in Computer Engineering completed with 93.65%.
- Recognized as Top Performer in Internshala's Machine Learning with AI training program.
